EXPERIENCE

Quality Assurance Intern

May 2024 – September 2024

LawAdvisor Ventures

Makati, PH

- Developed expertise in test case creation and ticket verification utilizing Jira Xray Test Management, while gaining hands-on experience with test automation using the Robot Framework and quality assurance best practices.
- Ensured high standards of software quality for stakeholders and clients by rigorously testing applications, identifying and documenting bugs, and facilitating efficient issue resolution.
- Strengthened soft skills, particularly in communication and teamwork, by clearly articulating ideas and collaborating effectively with cross-functional teams to meet project goals.

Vice President for Communications

October 2023 – September 2024

PUP Taguig Computer Society

Taguig, PH

- Exhibited strong organizational and leadership skills by managing events and delegating tasks effectively, leveraging Notion for streamlined project and task management.
- Developed compelling and engaging captions for publication materials, increasing follower engagement and fostering a sense of community.
- Enhanced key soft skills, including communication, collaboration, and leadership, contributing to a cohesive and motivated team environment.

PROJECTS

Space Share | *Git, GitHub Projects, Angular, daisyUI, Jira*

- Served as the business analyst, leading the development of an innovative platform connecting tenants and property owners, streamlining the rental process through user-centric features developed with Angular.
- Oversaw project tasks and timelines using GitHub Projects and Jira, fostering collaboration within the team, and creating essential documentation, including flowcharts, reports, and user manuals.
- Applied advanced problem-solving skills to architect a seamless, user-friendly application, ensuring quality through comprehensive manual testing and rigorous code reviews.
- Developed and implemented well-designed email notifications to improve user communication and enhance platform engagement.

VRZN Banking System | *Git, Azure, Smartsheet, Hostinger, Semaphore*

- Led the development of a cutting-edge web banking application, seamlessly integrating Semaphore API for robust OTP authentication and interoperability with diverse banking and e-commerce platforms.
- Demonstrated exceptional project management acumen by meticulously orchestrating project timelines using agile methodologies such as Kanban, Gantt charts, and tables, ensuring the timely attainment of critical project milestones.
- Fostered a collaborative environment among team members, encouraging innovation and creativity to drive project success while ensuring alignment with project objectives and timelines.
- Applied advanced problem-solving skills to architect and implement a user-friendly and secure banking application, prioritizing stringent validation protocols to fortify data integrity and enhance transactional security.

EDUCATION

Polytechnic University of the Philippines

Bachelor of Science in Information Technology

Taguig, PH

2021 – Present
